Status						
1) Responsive to communication(s) filed on <u>07 December 2002</u> .						
2a) This action is FINAL . 2	b)☐ This action is non-final.					
	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4) Claim(s) <u>1-41</u> is/are pending in the ap 4a) Of the above claim(s) is/are 5) Claim(s) is/are allowed. 6) Claim(s) is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) <u>1-41</u> are subject to restriction	e withdrawn from consideration.					
Application Papers						
9)☐ The specification is objected to by the Examiner.						
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
2. Certified copies of the priority of	documents have been received. documents have been received in A of the priority documents have been hal Bureau (PCT Rule 17.2(a)).	Application No received in this National	Stage

1) Notice of References Cited (PTO-892)	, 	Summary (PTO-413) s)/Mail Date				
 2) Notice of Draftsperson's Patent Drawing Review (PT 3) Information Disclosure Statement(s) (PTO-1449 or F Paper No(s)/Mail Date 		nformal Patent Application (PTC	D-152)			

DETAILED ACTION

Claims 1-41 are pending.

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to methods for preparing a peptide-spacer-lipid conjugate, classified in class 530, subclass 334.
 - II. Claims 17-24 and 27-41, drawn to a peptide-lipid-spacer conjugate, classified in class 514, subclass 2.
 - III. Claims 25-26, drawn to a targeted therapeutic liposome, classified in class 424, subclass 450.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process, i.e. incorporating the end-group functionalized PEG-lipid conjugates into liposomes and then conjugating with peptide ligands or direct incorporation of the peptide-PD lipid conjugates into liposomal membranes, as set forth in the Specification at pages 3-5.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be

Application/Control Number: 10/016,569

Art Unit: 1654

made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process, i.e. incorporating the end-group functionalized PEG-lipid conjugates into liposomes and then conjugating with peptide ligands or direct incorporation of the peptide-PEG lipid conjugates into liposomal membranes, as set forth in the Specification at pages 3-5.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions, are materially distinct and different products, i.e. the liposome comprises other components, which materially affect the fundamental characteristics of the invention.

Because these inventions are distinct for the reasons given above, the search required is not required for each Group, the inventions have acquired a separate status in the art because of their recognized divergent subject matter and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Claims 17-24 and 27-41 are generic to a plurality of disclosed patentably distinct species comprising peptide-spacer-lipid conjugates. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and enumerate *all* of the components of the *one* specific conjugate as claimed (i.e. specifically claims 20-23) even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the

Application/Control Number: 10/016,569

Art Unit: 1654

examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

General Information Regarding Further Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jennifer I. Harle whose telephone number is (571) 272-2763. The examiner can normally be reached on Monday through Thursday, 6:30 am to 5:00 pm,.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda Brumback can be reached on (571) 272-0961. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
